

Matt Carter

Full Stack JavaScript Developer with a passion for building creative, complex web applications. Looking to bring my detail-oriented engineering approach to collaborate with smart people to help solve hard problems.

EXPERIENCE

Stealth Startup

Software Engineer, Co-founder

Aug 2016 - Present

As principal engineer for a file-sharing startup, built:

- Node/Express API for interacting with PostgreSQL database
- Passport auth strategies, including third-party oauth
- Node servers for uploads, image/video processing and cloud storage
- Nginx reverse proxy to route HTTP traffic between servers
- RabbitMQ exchanges/queues to route messages between servers
- React/Redux frontend

General Assembly, San Francisco, CA

Web Developer

Jan 2016 - Apr 2016

Completed a 12-week development course, working with other developers and independently on a diverse variety of projects.

PROJECTS

Anagram Battle!! anagram-battle.com (GitHub)

Go head to head with a variety of fearsome monsters, using your word knowledge to defeat them. Come up with 3 anagrams for the word given to send your foe to his doom. Defeat all eight monsters to become the supreme champion of vocabulary wisdom!

Designer/Developer(front-end) - JavaScript, JQuery, ExpressJS

BirdSpots birdspots.net (GitHub)

BirdSpots is a full stack app for bird watchers to record the bird, date, & location (with Google Maps integration). Users are able to see their past entries in a list, and as markers on a map. It allows Birders to leave the pen and paper diary at home and record their entries in a more user-friendly and permanent way.

Designer/Developer(full-stack) - MongoDB, ExpressJS, AngularJS

JF Hillebrand, USA, Benicia, CA

Domestic Logistics Coordinator

Jun 2014 - Jan 2016

Worked as the lead on a small team to manage freight consolidation and domestic logistics for a large international beverage distributor. Communicated directly with client purchasing and logistics vendors to ensure on-time pickup and delivery of product.
