Profile

Full Stack JavaScript Developer with a passion for building creative, complex web applications. Looking to bring my detail-oriented engineering approach to collaborate with smart people to help solve hard problems.

Skills

- Javascript
- React
- Node.js
- Angular
- Express.js
- HTML / CSS
- MongoDB
- JQuery
- Webpack

Education

GENERAL ASSEMBLY - SAN FRANCISCO CA

Graduate - Web Development Immersive 2016

Experience

MBAY.IO

Full Stack Developer | Monterey Bay, CA | 2016-Present

Built React front end for application to discover and control IoT devices. Also built back end for file sharing application with multiple Node.js servers for resumable uploads, image processing, and cloud storage.

GENERAL ASSEMBLY

Web Development Student | San Francisco, CA | 2016

Completed a 12-week development course, working with other developers and independently on a diverse variety of projects.

JF HILLEBRAND, USA

Domestic Logistics Coordinator | Benicia, CA | 2014-2016

Worked as the lead on a small team to manage freight consolidation and domestic logistics for a large international beverage distributor. Communicated directly with client purchasing and logistics vendors to ensure on-time pickup and delivery of product.

Projects

ANAGRAM BATTLE!!

anagram-battle.com | github.com/mcarter78/anagram-battle

Go head to head with a variety of fearsome monsters, using your word knowledge to defeat them. Come up with 3 anagrams for the word given to send your foe to his doom. Defeat all eight monsters to become the supreme champion of vocabulary wisdom! Designer/Developer(front-end) - JavaScript, JQuery, ExpressJS

BRICK CLICKER 2016

brickclicker2016.win | github.com/mcarter78/brickclicker2016

The app did not succeed in influencing the election, but it's still fun to add some bricks and see what happens! A dumb little web experiment in political satire. Designer/Developer(front-end) - Angular, Firebase

LP CHECK

lpcheck.com | github.com/mcarter78/LPCheck

My first self-taught React project: LPCheck is a simple app that uses the Discogs.com API to fetch my record collection. When I find a record that I want, I can use the search feature on my app to make sure that I don't have it already. Designer/Developer(front-end) - JavaScript, React
